work they do at Blue Shield. Under Kathryn Qin's leadership, Kevin and his team exemplify how actuarial analysis isn't just about numbers — it's about the lives and well-being of countless individuals. Continue reading to discover the stories behine the data revealing what it's like to work at Blue Shield as an actuarial analyst and the unique challenges and rewards that come with the role.

What first brought you to Blue Shield?

Taylor: I became interested in Blue Shield in college. I was part of an actuarial organization called Gamma Iota Sigma, and Blue Shield contacted them looking for interns. The more I looked into the opportunity, the more it really attracted me. Blue Shield's mission statement and two percent pledge made me think it would be a meaningful place to work.

Kevin: I am particularly proud that Blue Shield is a nonprofit. Working on products, I can see how my daily work trickles down into living and embodying our mission. We are trying to create a product that is affordable for our family and friends. In the health insurance industry, we can often be seen as the bad guys, but here I feel like we're doing something good in the sense that we're not seeking to profit from a necessity.

How long have you been with Blue Shield?

Taylor: Since the summer of 2022, so approaching two years.

Kevin: Four years now, coming up on five in July.

Taylor Grimes

Kevin, you'll be eligible for your sabbatical soon. Any thoughts on how you'll be spending your four weeks of paid time off?

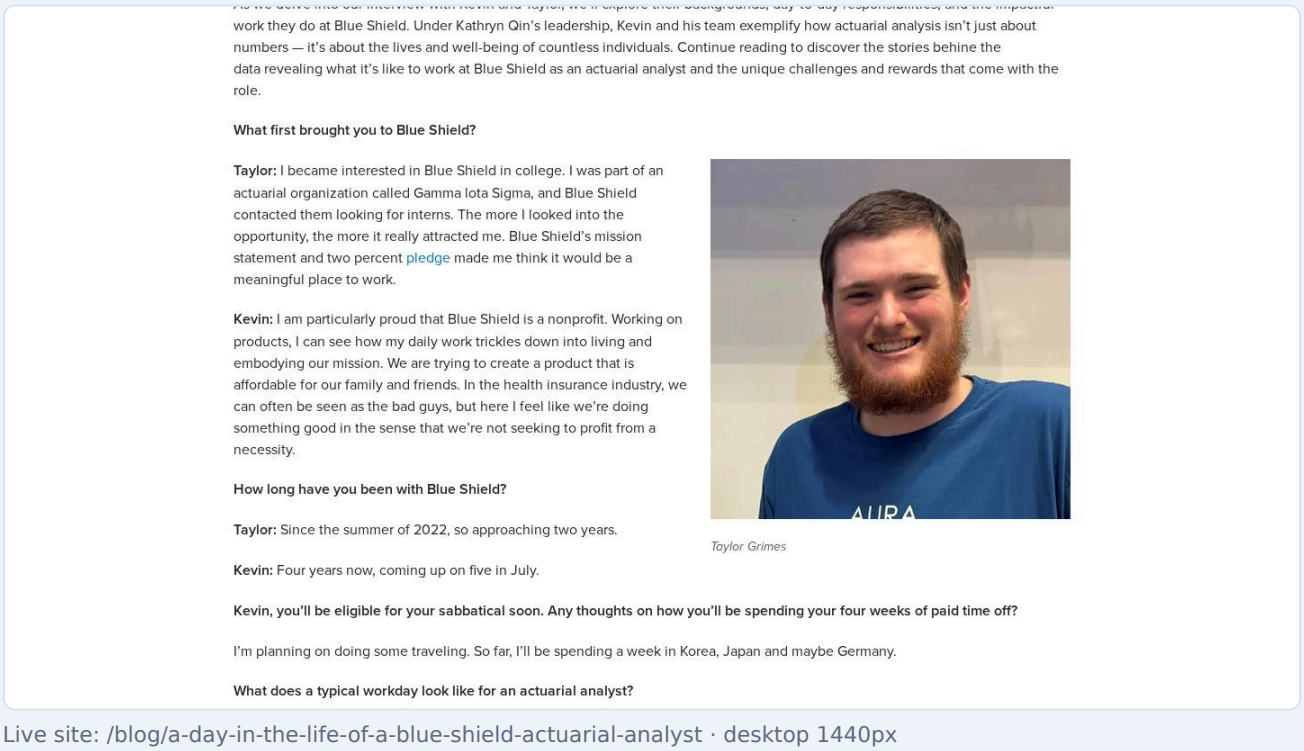

I'm planning on doing some traveling. So far, I'll be spending a week in Korea, Japan and maybe Germany.

What does a typical workday look like for an actuarial analyst?

The Internship Program is a ten-week opportunity to provide undergraduate and graduate students with real-life work experiences while learning what a career at Blue Shield of California offers. Interns work on real-world projects and initiatives while being immersed in many aspects of the business. From interacting with senior leadership to development through hands-on experience, interns will build a better understanding of the diversity and complexities of working in the dynamic world of health insurance and health care.

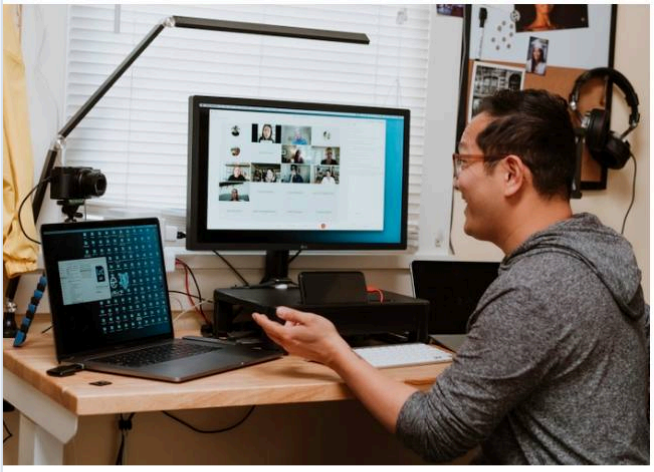

As an intern in our program, you will:

- Gain exposure to our mission and enterprise goals while having a curriculum based on our leadership mode
- Build meaningful relationships and connections through team building and volunteering in the community
- Get hands-on experience with real work projects and work on challenging department assignments
- build meaningful relationships and connections through team building and volunteer experiences
- Partner with a mentor who will help guide you through the program and future career planning

Connecting with purpose

Our workplace model is designed around intentional in-person interaction, collaboration, connection, creativity and flexibility. For most teams, this means coming into the office two days each week. For employees with medical conditions that may impact their ability to work in-office, we are committed to engaging in an interactive process and providing reasonable accommodations to ensure their work environment is conducive to their success and well-being.

Our hybrid strategy aligns with our core values

Human: We know that flexibility is a key component to what makes us a great place to do meaningful work.

Honest: We know that intentional cross-collaboration ensures we can provide the best service for our members.

Courageous: Our mission remains at the center of all we do.

Observed Behaviors

Observed behaviors

bsc-header — **5 states**

Desktop (1440px): utility bar, logo, horizontal primary nav and a “Find your next role” button; “Life at Blue Shield” carries a dropdown (ipr_dropdown_2.js) that does not open on hover. Mobile (390px): the nav collapses to a hamburger (“Open Navigation Menu”) that opens an off-canvas “Menu” panel with the same links (sub-items indented), a close (×) button and a full-width “Find your next role” button. That button leaves the site for Oracle Recruiting Cloud.

bsc-poll — **4 states**

“[+] Feedback” (footer-feedback-link) reveals a hidden #poll block with 6 radio questions; submit validates (poll_alert), then shows a success state and results charts from /poll_charts/.

bsc-gallery — **3 states**

Gallery images link to /_gallery/get_file/?file_id=…; clicking opens them in a lightbox (lightGallery / Magnific Popup).

bsc-video-tiles — **3 states**

Tiles link to youtube.com/watch URLs and open a modal YouTube player (Magnific Popup iframe type).

bsc-faq — **2 states**

11 .faq-item entries with .faq-caller headers toggle .faq-body answers (collapsed by default).

bsc-story-listing — **4 states**

GET form (q, c[Role], c[Topic], s, search_type=and) reloads /blog/search with results; ?page=N pagination, 9 tiles per page, 13 pages; 39 tiles link to news.blueshieldca.com.

onetrust — **3 states**

OneTrust banner (“We use trusted partners to improve your experience” + Continue) shows on first visit; OtAutoBlock blocks tags until consent; footer “Cookie preferences” reopens it.

bsc-share **2 states**

Share buttons open LinkedIn/Facebook/X share dialogs in a new window.

canonical-defect **1 states**

SEO defect on the live site: 10 key pages (home, belonging, blog, events, growth, hiring, life, total-rewards, why-relocate, authors/search) declare canonical URLs on http://uat.bsccareers.iprsoftware.com — several at legacy slugs (/diversity-equity-inclusion, /university-programs, /our-benefits-and-programs, /workplaces-of-the-future). Fix in EDS and add the legacy slugs to the redirect map.
